Surgeon's Darlings for Precision, Performance and Pleasure.

The Winner of the
iF DESIGN AWARD 2016
Category Medicine / Healthcare

B | BRAUN
SHARING EXPERTISE

Aesculap® ELAN 4

Surgeon's Darlings for Precision and Performance – Engineered in Germany.

As a surgeon, I need to do the best job possible in order to maintain my patients' health and quality of life and to save lives.

We surgeons are perfectionists and we are under constant pressure. That's why precision is extremely important to us.

Both in my private life and at work, I attach great value to high-performance, high-precision, reliable products that meet these requirements and help me to achieve my goals.

Why should I accept compromises in the operating theatre?

AT WORK

PRECISION

PERFORMANCE

PLEASURE

Aesculap® ELAN 4

Surgeon's Darlings for Precision.

The watch I wear is a masterpiece of precision and each cog is a remarkable work of art. I wear it on my wrist all day long and it has almost become a part of me. I can hardly feel it but I know it's there and is working perfectly.

That's just how I feel about the ELAN 4. It sits perfectly in my hand and is so well balanced that it has become like an extended arm, a natural part of my hand. The ELAN 4 is precise, comfortable to hold and it runs smoothly and quietly.

How did they achieve that?

ERGONOMICS

INNOVATIVE GERMAN ENGINEERING:

- › New positioning of the motor before the angle, meaning there is no need for an angle gear or a motor coupling.

RESULT:

- › no couplings needed
- › handpieces become shorter and lighter
- › the angle does not get hot
- › sits comfortably in the hand
- › can be held more reliably and comfortably

BENEFITS:

*high-precision,
convenient and safe grip*

Aesculap® ELAN 4

Surgeon's Darlings for Performance.

My car has to be reliable and have enough horsepower – for me, that goes without saying. As well as accelerating quickly when required, it needs to cruise smoothly on long journeys and take me to my destination quickly and safely. I expect exactly the same from my motor system.

ELAN 4 sets new standards in terms of overall performance. Never before have I laid hand on a system that operates so quietly yet is so powerful.

How was this made possible?

HIGH-SPEED

DESIGN
AWARD
2016

The Winner of the
IF DESIGN AWARD 2016
Category Medicine / Healthcare

INNOVATIVE GERMAN ENGINEERING:

- › integrated motors
- › on/off function integrated into the cable or hose to the motor coupling

RESULT:

The rotation speed is directly transferred, resulting in

- › very smooth running
- › no loss of power
- › high reliability
- › compact construction – no extra switch

BENEFITS:

quick, powerful and reliable work

Aesculap® ELAN 4

Surgeon's Darlings for **Pleasure.**

In our high-tech world, simplicity is now a luxury – things need to be simple to use. It's more fun when things just work intuitively, without the need for head-scratching or guesswork. Just like my smart phone. It is intuitive to use and all of my important apps are clearly arranged on the home screen.

The same is true of the ELAN 4. I can select the motor drive type that I am used to. The systems are straightforward and operation is self-explanatory.

The couplings work according to the plug and play principle and the burrs fit every length of hand-piece. This is what stress-free work looks like.

This brings a smile to my face – and I bet I'm not the only one!

TWO SYSTEMS

INNOVATIVE GERMAN ENGINEERING:

- all couplings are plug and play compatible
- standardised burr lengths and clear coding of burrs
- all operating elements are marked gold

RESULT:

- extremely easy to use
- streamlined surgical set with fewer components
- handpiece will always contain the correct motor
- self-explanatory
- all types and sizes of burrs are available for all handpiece lengths

BENEFITS:

The system is a joy to work with because it is set up clearly and simply. Fewer components and a universal burr length offer savings potentials.
